

All CertifHy audits are performed in accordance with the applicable documents and requirements of the CertifHy Scheme. The relevant requirements of CertifHy are specified in the audit procedure (Auditor's Checklist), which must be used by auditors of certification bodies for audits of the CertifHy EU RFNBO Voluntary Scheme.

The full audit procedure is available to the certification body, the certified company and CertifHy. Based on the audit procedure, the certification body prepares and submits this summary audit report to CertifHy and the certified company. The audit summary report is posted on the CertifHy website along with additional information about the CertifHy certificate. This report provides an overview of the relevant aspects and results of the audit of an economic operator certified under CertifHy and improves transparency. The information and data in the report reflect the situation at the date of the audit. Only activities, processes, or materials relevant to the CertifHy Audit will be included in this Audit Summary Report. The report shall not contain information or data that is confidential or sensitive to the company, including data on quantities or volumes of material, names or addresses of subcontractors or service providers, customers or others. Therefore, data on sustainable material volumes are provided on a voluntary basis only. The Summary Audit Report must be provided to all CertifHy-certified Economic Operators, and its publication on the CertifHy website is mandatory.

The design of this report is provided by CertifHy to allow for a harmonized approach and encourage comparability. The Certification Body is responsible for the accuracy of the information provided.

1. INFORMATION ABOUT THE CERTIFICATION BODY

DEKRA Certification SL

C/ Calle Jesús Serra Santamans, 2, Planta 4ª 08174 Sant Cugat del Vallés (Barcelona) | Spain

www.dekra-certification.es

2. ECONOMIC OPERATOR

Company Name	AIR LIQUIDE FRANCE INDUSTRIE, SA
Address	10 avenue Aristide Briand 92 220 Bagneux
Country	France
Contact: Name, phone, email	Sarah Alarcon; +33 (0) 612 855 354; sarah.alarcon@airliquide.com
Scope of certification	Purification and compression unit
Year of the first certificate	2026
List of sites under scope	ZI quartier le Tonkin 13270 Fos sur Mer
Input products handled (physically) by certified sites	RFNBO based H ₂
	Electricity for balance of plant
Output products handled (physically) by certified sites	<i>Purified and compressed RFNBO Hydrogen</i>
Type of product marketed	<i>RFNBO Hydrogen</i>

3. PROCESS

The organization's process involves purifying the hydrogen received from its supplier via pipeline and then shipping it to its customers, also via pipeline. This requires decompressing the received hydrogen prior to the purification process, which consists of removing various impurities such as metals and other substances, but primarily the moisture from the product.
